Investment Objective

Stable, superior returns through both favorable and unfavorable economic and market conditions.

Investment Strategy

The Fund pursues return stability by diversifying across multiple uncorrelated and complimentary global asset classes and strategies. Asset classes include equities, real-estate, fixed income, Gold and other commodities and currencies. Investment strategies include value, momentum, macro and options-based strategies.

Superior returns are sought through portfolio tilts driven by macroeconomic factors and quantitative measures of risk and return. In addition, 'Special Situation' investments are overlaid onto the core portfolio when generally overlooked market disequilibria that offer the potential for low risk and high returns are identified.
