Series AD: [AHP 3205](#)

Series FD: [AHP 3215](#)

---

# Important Disclaimers

\*For the period from inception to December 31, 2024, the performance data of Series ETF reflects the historical return of the LP, which for this period had substantially similar fees as the LP. Effective January 2, 2025, WaveFront All-Weather Fund, LP (“the “LP”) was merged into WaveFront All-Weather Alternative Fund. Prior to the merger, the LP was distributed to investors on a prospectus-exempt basis in accordance with National Instrument 45-106 and was not a reporting issuer from its inception on November 1, 2019 until the merger. Financial statements of the LP are posted on Arrow’s website and are available to investors upon request.

Commissions, trailing commissions, management and performance fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns net of fees and expenses payable by the fund (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

The risk level of a fund has been determined in accordance with a standardized risk classification methodology in National Instrument 81-102, that is based on the fund’s historical volatility as measured by the 10-year standard deviation of the fund’s returns. Where a fund has offered securities to the public for less than 10 years, the standardized methodology requires that the standard deviation of a reference mutual fund or index that reasonably approximates the fund’s standard deviation be used to determine the fund’s risk rating. Please note that historical performance may not be indicative of future returns and a fund’s historical volatility may not be indicative of future volatility.

Portfolio holdings and sectors will fluctuate over the life of the mutual fund as the portfolio holdings and market value of each security changes. The portfolio manager(s) may change the portfolio allocations in some or all of the sectors.

The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values or returns on an investment fund. The Investment Growth chart shows the final value of a hypothetical investment in securities in this series of the fund as at the end of the investment period indicated and is not intended to reflect future values or returns on investment in such securities. The comparison presented is intended to illustrate the historical performance of the fund as compared with the historical performance of a widely quoted market index or a weighted blend of widely quoted market indices. There are various important differences that may exist between the fund and the stated indices that may affect the performance of each. The objectives and strategies of the fund result in holdings that do not necessarily reflect the constituents of and their weights within the comparable indices. Indexes are unmanaged and their returns do not include any sales charges or fees. It is not possible to invest directly in market indices.

Published March 2026.

# About WaveFront

**WaveFront Global Asset Management is an independently owned, Canadian-based asset manager, specializing in quantitative absolute-return investment strategies.**

- ❖ **Independent Canadian quant specialist (est. 2003)** – built from the ground up to deliver absolute-return solutions that thrive across market cycles.
- ❖ **Proven innovators** – launched Canada’s first daily-liquidity managed-futures fund and other market firsts in North America and Asia.
- ❖ **Significant principal co-investment** – leadership and employees commit significant portion of Firm AUM alongside clients, ensuring strong alignment of interests.
- ❖ **Data-driven & risk-focused** – research-led models and rigorous risk controls power balanced performance in both risk-on and risk-off regimes.

## History of WaveFront since 2003 to Present

# Principals & Philosophy

## Data proliferation

- The accelerating proliferation of data increasingly illuminates the behavioral and structural inefficiencies embedded in financial markets, revealing patterns that give rise to repeatable, predictive investment opportunities..
- We believe that firms with the research capabilities and technology to effectively harness this data are most likely to emerge as the winners.

## Scientific, research-driven

- We ground our philosophy in first-principles thinking and the scientific method—observation, hypothesis, testing, and refinement.
- Our culture of curiosity, collaboration, and disciplined innovation drives a process that blends creative insight with rigorous experimentation, advanced technology, and systematic execution.

## Institutional Infrastructure

- Our fully integrated, in-house technology platform and custom software supports research, trading (OMS/EMS), and reporting across the investment lifecycle.
- Robust internal operating processes ensure consistency, accountability, and precision from research through execution and oversight.

## Research framework

- Quantitative & risk management research is supported by Dr. Adam Kolkiewicz, Professor of Statistics at the University of Waterloo and for the Master of Quantitative Finance program.
- Fundamental research is supported by Dr. Burton Malkiel, Professor of Economics at Princeton University and author of A Random Walk Down Wall Street.

# Overview: WaveFront All-Weather Alternative Fund

The **WaveFront All-Weather Alternative Fund** combines diversification, systematic risk management, and institutional-grade investment strategies - packaged in a mutual fund and ETF for daily liquidity.

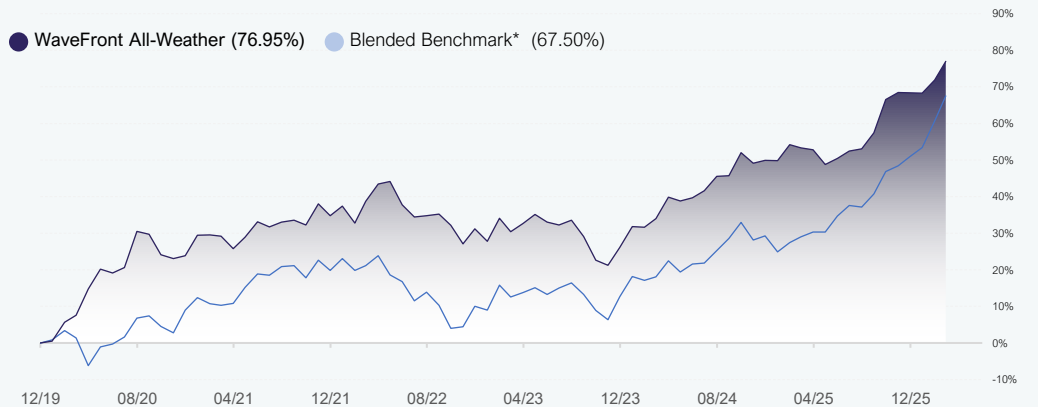

- Actively managed, global multi-asset and multi-strategy fund that seeks to deliver consistent, superior risk-adjusted returns across diverse market conditions.
- Allocates across uncorrelated assets and strategies that respond differently to shifting market regimes; including equities, fixed income, real estate, systematic macro & trend, alternative defensive and special situations.
- Diversification across uncorrelated asset classes and defensive exposures such as managed futures and gold creates portfolio resilience, enabling greater risk-taking in return-seeking assets like high-beta stocks, long-duration bonds, and growth-oriented REITs.

# About the IFM: Arrow Capital Management

**Arrow Capital Management is a \$1.8 billion Canadian, employee-owned investment firm founded in 1999**, with a long-standing track record in active portfolio management and alternative investments. With over two decades of experience navigating multiple market cycles, Arrow has built a diversified platform designed to prioritize capital protection and disciplined risk management.

## **Why Arrow Matters to All-Weather Investors**

- **Established Scale & Credibility:** ~\$1.8B AUM across actively managed and alternative investment strategies
- **Aligned Ownership Structure:** Employee-owned firm with principals investing alongside clients
- **Deep Alternatives Expertise:** Over 20 years focused on manager selection, portfolio construction, and risk oversight
- **Institutional-Grade Risk Discipline:** Ongoing monitoring of trading activity and portfolio risk across strategies
- **National Distribution Footprint:** Pan-Canadian sales network.

Arrow provides the distribution strength, operational oversight, and institutional framework that allows WaveFront to focus on what it does best: systematic portfolio design and execution.

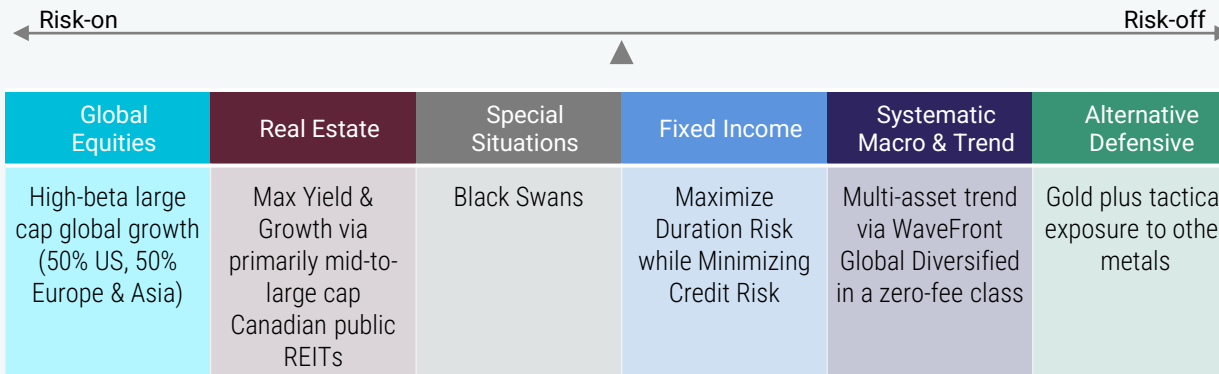

### **Quick Facts:**

Founded:	1999
Head Office:	Toronto, Canada
AUM:	\$1.8 billion
Ownership:	Employee-owned
Role with WaveFront:	Investment Fund Manager (IFM) for All-Weather and Global Diversified strategies

# Multi-Asset Multi-Strategy Approach

**By combining uncorrelated assets and strategies, the WaveFront All-Weather Alternative Fund remains balanced whether markets are risk-on or risk-off.**

- Diversification across uncorrelated asset classes and defensive strategies creates portfolio resilience, enabling greater risk-taking in return-seeking assets.
- Asset, factor and strategy exposures are evaluated independently and at the portfolio level - the result is a set of exposures that work together rather than compete.
- Diversification benefits across uncorrelated assets and strategies, along with the ability to use Futures contracts to achieve certain exposures, creates structural portfolio alpha in the form of enhanced notional exposure of roughly 130%, thereby amplifying total return potential over time.

For illustrative purposes only.

The Portfolio systematically adapts and responds to maintain optimal exposure and diversification across changing market conditions.

### Portfolio Exposure

as of 2026-02-28

# Investment Process

## The WaveFront All-Weather Alternative Fund allocates dynamically across five core asset classes and strategies:

### How we invest in....

<b>Global Equities</b>	Focus on high beta, large cap global growth companies in the US, Europe, and Asia to maximize right tail performance in risk-on environments.
<b>Fixed Income</b>	Focus on long duration, highly liquid, and primarily off-the-run sovereign bonds for maximum baseline yield and flight-to-quality performance in risk-off periods of deflationary market stress.
<b>Real Estate</b>	Seek maximum REIT yields by focusing on Price/FFO, leverage and size factors, complemented by allocations to REITs that operate more like opportunistic REPE firms that pursue higher IRRs from capital appreciation of distressed, redeveloped or re-positioned assets. Real-estate exposures tend to add the most value during “muddle-through” environments for equities.
<b>Alternative Defensive</b>	A blend of non-correlated assets designed to provide stability and resilience during inflationary and market stress environments.
<b>Systematic Macro &amp; Trend</b>	A rules-based approach to global macro investing, capturing opportunities across major asset classes using trend-following and systematic factor (yield and value) strategies. This strategy provides exposure to uncorrelated assets - currencies and commodities - and tilts beta exposures to equities and fixed-income.

## Tactical ‘Special Situations’ Overlay

The Fund tactically invests where overlooked market disequilibria create the potential for unique, low risk, high return investment opportunities.

### Special Situation Criteria:

- ✓ **Well-defined Catalyst**  
 Investment ideas must have a definable catalyst that can be analyzed, monitored, and investible while still near 0% priced-in.
- ✓ **Quantifiable Investment Costs**  
 Investment costs must be quantifiable including time-decay premiums and maximum potential loss.
- ✓ **Significant Reward-to-Risk Payout**  
 Investment ideas must present significant asymmetric return potential relative to both investment costs and estimated maximum loss.

# Risk Management

- **Targeted portfolio risk levels** creates tactically managed risk budgets for each asset class and strategy based on dynamic volatility and correlation of those exposures.
- **Various risk measures and portfolio constraints** monitored and used to manage exposures in real-time.
  - Realized Downside Volatility: positions reduced to stay within downside volatility limits
  - VaR limits at the portfolio and asset class level manage pro-rata reductions in exposure to remain within VaR limits.
  - Stress-testing to known historical and hypothesized future events can result in exposure management or special situation trades that would hedge the portfolio against potential risks
- **Liquidity, leverage, concentration, market stress, counterparty and operational risks** are also monitored.

# WaveFront All-Weather’s Role in a Portfolio

**As a strategic allocation within a well-diversified portfolio, the Fund is designed to help investors pursue consistent, resilient returns across a wide range of economic and market conditions.**

Investors may use the Fund in several ways:

- ❖ The Fund’s capital-efficient structure allows exposure to a broad mix of asset classes - including gold, real estate, commodities, equities, fixed income, and special situations- all within a single investment product.
- ❖ By *reallocating from traditional bond holdings*, the Fund can potentially enhance returns while maintaining portfolio stability.
- ❖ By *reallocating from equity-heavy positions*, the Fund can reduce overall portfolio risk without sacrificing long-term growth potential.
- ❖ With its systematic, balanced, and multi-strategy approach, the Fund can serve as a powerful diversifier across both traditional (e.g., stocks, bonds, cash) and alternative (e.g., hedge funds, private credit, real assets) allocations.

For illustrative purposes only.

### Comparing Traditional vs. Diversified Portfolio w/ WaveFront All-Weather Fund\*

Time Period: 2019-12-01 to 2026-02-28

- WaveFront All-Weather<sup>1</sup>
- Canadian Equity<sup>2</sup>
- U.S. Equity<sup>3</sup>
- Fixed Income<sup>4</sup>

	60 40 Portfolio	55 35 10 Portfolio	50 30 20 Portfolio
Annualized Return	9.43%	9.65%	9.86%
Volatility	9.80%	9.30%	8.90%
Sharpe Ratio	0.69	0.75	0.80
Sortino Ratio	1.08	1.20	1.32
Worst Drawdown	-13.34%	-12.27%	-11.33%

1. WaveFront All-Weather uses the net return of the WaveFront All-Weather Alternative Fund (AHP3215)  
 2. Canadian Equity uses the net return of the iShares S&P/TSX 60 ETF (XIU:CA)  
 3. U.S. Equity refers iShares Core S&P 500 CAD Hedged ETF (XSP:CA)  
 4. Fixed Income refers to the iShares Canadian Universe Bond ETF (XBB:CA)

# Competitive Analysis

The WaveFront All-Weather Alternative Fund has consistently outperformed its peer group, delivering superior returns and value to our investors.
